

Tired of Wet Cardboard & Jobsite Trash?

Smart, Simple, Contractor Approved

Introducing Patriot Aluminum's newest innovation:
The Patriot Eco-Pack™.

Designed for Contractors & Distributors, the Patriot Eco-Pack™ eliminates many of the problems associated with traditional cardboard boxes.

With a clear body and re-sealable snap-tight lid, this new Patent Pending packaging not only keeps jobsite dirt, dust, and moisture away from your fittings....it also makes it easy to see how many pieces are left in the box.

When closed, the Patriot Eco-Pack™ has a built-in rail to make stacking easy. When your job is over, these containers can be reused for other organization projects, and nest together for easy storage. You'll never have to deal with wet, dirty, or destroyed cardboard again.
