

## **Patriot Industries Continues Commitment to Safety with NSF Certification**

**Louisa, VA— September 14, 2018** —Patriot Industries, a leader in the electrical raceway industry, has received NSF/ANSI Standard 169 certification for its lines of Rigid Aluminum and Rigid Stainless Steel Conduit, Nipples, Elbows, and Couplings. Patriot is the first in the industry to offer this certification for both materials, representing the company’s commitment to the industry. Tom Click, President & CEO of Patriot Industries, commented “Rigid Aluminum & Rigid Stainless Steel raceway products are commonly used together. With Stainless Steel being used in the most aggressive washdown areas, and lower cost Aluminum being used in ancillary areas.”

In addition to the official NSF/ANSI 169 certification, Patriot uses only modern vegetable oil-based cutting fluids when manufacturing Aluminum or Stainless Steel products. “We have many customers involved in the food and pharmaceutical industries, and our modern cutting fluids produce products which are simply much cleaner than others in the industry,” says Isabelle Puryear, Patriot’s Inside Sales Director. Click commented, “I’m proud to offer not only the first Rigid Aluminum line of NSF Certified products, and the most comprehensive raceway package, but also that these offerings come from an American Owned & Operated Family Business.”

While all of Patriot’s Aluminum & Stainless Steel products are covered under the certification, new labels with the official NSF Certified Component mark will appear in the coming weeks. NSF Certified Products may be found by searching online at <http://www.nsf.org/certified-products-systems>.

### **About NSF**

NSF International ([www.nsf.org](http://www.nsf.org)), The Public Health and Safety Company™, a not-for-profit, non-governmental organization, is the world leader in standards development, product certification, education, and risk-management for public health and safety. For 65 years, NSF has been committed to public health, safety, and protection of the environment. While focusing on food, water, indoor air, and the environment, NSF develops national standards, provides learning opportunities, and provides third-party conformity assessment services while representing the interests of all stakeholders. The primary stakeholder groups include industry, the regulatory community, and the public at large.
